Product name : Chedu

Team name : Chedu team

Release name : Chedu service

Release date : July 26, 2017

Revision number : 1.0, revision on July 8, 2017

1. High level goals

Our service provides an educational platform to both of professors and students. Chedu has two classes of users. One is distributer, who wants to share his own PPT Document, and the other one is learner, who receives the material given by distributor. At the initial plan of Chedu project, our team thought distributor must be the professor. However, after team scrum that held after initial presentation feedback, we decided to extend our service. Chedu project now allows that student can also distribute their PPT, for their group project discussion. So Chedu supports not only in-class activity, but also group projects.

2. User Stories for release

   Sprint 1 : Log in (First Week)
   - (10) As a Student, I want to access on the lecture page when I input my Cruz ID, and code given by professor.
   - (10) As a Professor, I want to upload my lecture slides to my students.
   - (5) As a Professor, I want to see the code for lecture when I upload my .ppt file.

Sprint 2 : Live Chat (Second Week)

- (10) As a Professor, I want to share my lecture slides to my student.
- (5) As a Student, I want to see/write comment on current discussion that made on live chat.
- (5) As a Professor, I want to see/write comment on current discussion that made on live chat.
- (3) As a Student, I want to see Entrance code at the top of the live chat for local sharing.

Sprint 3 : Download support (Third Week)

- (10) As a Student, I want to download the chat log during the lecture/after lecture for review.
- (10) As a Professor, I want to download the chat log during the lecture/after lecture to evaluation.
- (5) As a Student, I want to download the lecture that given by Professor.
